Github: github.com/JasleneKaur

Email: jaslene2502@gmail.com
Mobile: +91-9877751979

SKILLS

Programming Languages:	C++, Java, C, Python, SQL
Frameworks:	HTML, CSS, JavaScript
Data & Analytics tools:	Power BI, Advanced Excel, MySQL
Data Science skills:	Mathematics, Statistics, EDA, Pandas, Numpy, Scikit Learn, Plotly, Seaborn
Machine Learning:	Regression, Model evaluation, Regularisation, SVM, Naive Bayes, Decision Trees
Soft Skills:	Problem-Solving, Team Player, Adaptability

PROJECTS

Linux-based File Encryption & Decryption System [Github Repo](#) Jan 2026- Feb 2026

- Developed a Linux-based file encryption & decryption system capable of processing 5,000+ files concurrently using multi-process architecture.
- Improved file processing speed by ~30–40% through parallelism with fork and optimized I/O using memory-mapped files .
- Implemented Shared Memory, Semaphores, and Mutexes to ensure **zero data corruption** and synchronized inter-process communication.
- Tech: C++ , Linux System Calls , IPC , mmap , Process Synchronization

Calories burnt Predictor [Github Repo](#) Sep 2025 - Oct 2025

- Built and compared 5 regression models (Ridge, SVR, KNN, Random Forest, XGBoost) using 7 physiological features on a public dataset (~15K records).
- Performed end-to-end data preprocessing, feature encoding, scaling, and model evaluation.
- Achieved $R^2 = 0.9988$, outperforming all baselines; stability confirmed via 5-fold cross-validation.
- Tech: Python, Pandas, NumPy, Scikit-learn, XGBoost

Olympic Data Analytics Dashboard [Live Dashboard](#) Sep 2025 - Oct 2025

- Analyzed historical Olympic data covering 200+ countries and thousands of athlete records to identify medal and participation trends.
- Developed an interactive Power BI dashboard with KPI cards, slicers, and drill-down views to track medals by country, sport, gender, and year.
- Built data models and DAX measures to enable performance insights.
- Tech: Power BI , DAX , Data Modeling , Excel

TRAINING:

Summer Training – Java Application Development [link](#) Jun 2025 - Jul 2025

- Completed a 50-hour Java program at LPU and built a Road Runner–style Java Swing game by designing game logic, handling collisions, and integrating scoring and sound.

CERTIFICATES

- | | | |
|--|-------------------------------------|----------|
| Computational Theory: Language Principles & Finite Automata Theory | Infosys Springboard | Aug 2025 |
| Responsive Web Design Developer Certification | freecodecamp | Nov 2023 |

ACHIEVEMENTS

- Top 30 out of 480 teams – Smart India Hackathon (SIH)** Oct 2023
Secured a high national ranking among 480 participating teams.

EDUCATION

Lovely Professional University Bachelor of Technology - Computer Science and Engineering; CGPA: 9.00	Phagwara, Punjab Aug 2023 - Present
Gems Cambridge International School Intermediate; Percentage: 81	Hoshiarpur, Punjab Apr 2022 – Mar 2023
St Antony's Convent School Matriculation; Percentage: 93	Adampur, Punjab Apr 2020 - Mar 2021
